

# We are a COVID-19 Secure Business

We confirm we have complied with the government's guidance on managing the risk of COVID-19

## 5 steps to safer working together

We have carried out a risk assessment specific to COVID-19 and made the results available to all of our staff

There are proper hygiene guidance procedures in that encompass workplace cleanliness, hand-washing and respiratory hygiene measures

We continue to follow the Duty to Accommodate measures for staff. Staff who are able to work from home will continue to do so

We have taken all reasonable steps ensure social distancing of 2 meters is maintained in our workplace

In the event where the 2 meter rule cannot be implemented, we have put control measures in place to reduce the risk to as low as reasonably practical
